ANANTH PRAJVAL TALLAVAJHULA

Career Objective:

To pursue a challenging career and be a part of a progressive organization that can give me an opportunity to utilize my skills and knowledge. As an enthusiastic and passionate developer confident to strive with hard work and resilience in a very competitive, fast paced growing teams. I am also confident to contribute a lot to the sales business domain, with my extensive experience at a very early stage. I have developed algorithms and code for sales projects and a startup. Carstreet.co is my own startup on which I work very dedicatedly on both (Web Development & Social media)

KEY SKILLS

- Hands-on experience in Web Development, Java Programming.
- Efficient in Java, HTML5, CSS, PHP, JavaScript, MySql, C Programming and C++.
- Team player and enjoys working in diversified cross-functional teams.
- Strong communication skills and capability to interact with both business and technical teams.
- Implementation experience using MySql data model in azure cloud.

Technical Skills:

Programming Languages:- Core Java, Advanced Java, C, C++, Basics of Python.

Web Technologies:- PHP, HTML5, CSS, JavaScript.

Databases:- MySQL, MongoDB.

Software Tools:- MS Office, Argouml, WEKA, Eclipse.

Operating System:- Windows, Unix.

PROFESSIONAL EXPERIENCE

1.) Project:- Carstreet.co (My Startup)

Period:- August 2019 - Present

Role:- Web Developer & Digital marketing

Project Details:-

- Designed and Developed the website for CarStreet.co.
- Creating post for social media & digital marketing.

Technologies Used:-

1. HTML 5
2. CSS
3. PHP
4. JavaScript
5. MySql

2.) Project:- Web Development using 'Azure cloud' as platform **Period:-** May 2019 - Jul 2019

Role:- Web Developer

Project details:-

- Done as part of MS Azure Project by Verzeo, Created a website.
- Using 'Azure cloud' as platform and HTML5, CSS, PHP, JavaScript and MySQL as programming language we developed a website.
- Used 'Azure Data Studio' for storing of data.

3.) Project:- Mumbai Dabbawala

Period:- Aug 2019 - Dec 2019

Role:- Web Developer.

Project details:-

This supply chain project has been claimed that this virtually achieves a six sigma performance rating, (ie. 99.9999% of deliveries are made without error, is at CMMI level 6). This project provides a Web page application through which people of Mumbai can order lunch service online using the internet.

- Designed & Developed a website using 'Xampp' server, as part of college course work.
- Used HTML, CSS, PHP, JavaScript as a front-end and sql as the back-end.
- Used MySQL database for storing and retrieving data.

4.) Project:- Space Shooter (Game)

Period:- Aug 2019 - Oct 2019

Role:- Software Testing.

Project details:

The main objective of Space Shooter is to save the battle ship from an asteroid attack. Player battle ship is located in the galaxy which tries to destroy the asteroids that enter into their air space. If the asteroids crossed or started entering into players air space then player starts attacking them.

- Unity software was used to develop Space Shooter game
- C# was used as coding language, some tools

5.) Project:- Mobile Based application for Passenger Facilitation

Period:- Jan 2020 - April 2020

Role:- Database developer & Administrator and Bug Testing.

Project details:

A mobile application needs to developed to track the registered passengers from resistance to home. The application will register passenger mobile number only for those who are willing to take this service. Passenger will be provided customized offers for Taxi, concessionaires etc. based upon passenger history and facility choices opted by the users. Further a separate module dedicated to VIP passenger facilitation needs to be incorporated. Projects should also have • User friendly UI/UX for Airport passangers. • Digitally Storing and Monitoring overall project related data.

- Developed using Java and C++ as programming language for front end and MySQL for back end.
- The complete programming for the android application has been done using 'Android studio'.
- 'Azure Data Studio' was used to connect between the database and the application using MySQL code and queries(Used to store and retrieve Data).
- This application has three modules namely Admin, Driver and User.

EDUCATION

B.tech, Computer Science and Engineering

Aug 2016 - Sep 2020

Jawaharlal Nehru Technological University, Hyderabad, India(Keshav Memorial Institute Of Technology)

Certifications/Seminars/Internships

Certificates:

- **Soft Computing** by NPTEL, 2019 (Completed)
- **Python** by NPTEL, 2019 (Completed)
- **HackerRank** Java, MySql (Completed)
- **Introduction to Machine Learning** by NPTEL, 2019 (Completed).
- **Introduction to Internet of Things** by NPTEL, 2019 (Completed).
- **Social Networks** by NPTEL, 2019 (Completed).
- **Microsoft Azure Project** by Verzeo, Bangalore (Completed).

Seminars:

- **Jini Technology**
- **Mobile App Design** using Argouml.

Internships:

- **Halla.in**: Web development & social network marketing.
- **Xane.AI**: Working on Java & MySql sample codes before assigning live work.
- **Lorhan It**: Working on MongoDB as Database Developer.

Personal Details:

Strengths : Quick Learner, Good Communication Skills, Quick decision maker,
Adaptive to new Technologies, Problem Solving Skills.

Languages: Telugu, Hindi, English, Marathi.

Hobbies : Playing piano, Listening music, Photography & Travel.
